How the Farmer Kept His Books

A farmer living four miles from town recently sold a mule which he did not need. With this money he wanted to buy some calves.

The check that he received for the mule he brought to this bank and deposited. We gave him a neat bank and check book. He is now buying a calf here and there, giving his check for each purchase. These checks are later presented at this bank and paid, and charged to the farmer's account.

The first of the month the farmer brings in his bank book, has it balanced and is given the paid checks. He discovers that each check is signed on the back by the person he gave it to, and answers as a receipt. And, furthermore he has a complete record of every transaction.

This Bank Has 30 Shareholders. Most of them Farmers

We are desirous of having farmers' accounts, even though small, for when they become experienced in banking their accounts are sure to grow larger. THERE IS NO SAFER BANK THAN

THE BANK OF MARBLE HILL.
